GPS technology LOCATION TRACKING

SET Fitness goals

powered by **Samsung**

FDA registered company

We invite you to experience a revolutionary new approach to emergency response: **MobileHelp Smart**.

MobileHelp, the nation's leading medical alert provider, has collaborated with Samsung to customize its Gear S3 Frontier smart watch with Emergency Response.

MobileHelp Smart Redefines the Medical Alert Marketplace

After more than a decade in this space, we know there is a stigma attached to medical alert devices. And we have consistently engineered our own product solutions to provide our customers with the best options possible – from trendy accessories to enhanced smartphone apps, MobileHelp has been on the cutting edge of this industry.

MobileHelp Smart goes one step further: it revolutionizes this space. In the way the smartphone changed our conceptualization of the phone being used as just a phone, MobileHelp Smart provides people with a multi-purpose solution: the features and benefits of a smart watch with Emergency Response as an insurance policy.

MobileHelp Features Ease-of-use in Smart Design

Not just an "app," this custom solution works for the consumer out of the box. No downloads needed. Additionally, the user will have two simple ways of getting help. Merely tapping the HELP button from the Home screen or holding the Back button for 3 seconds sends a HELP alert to our U.S.-based Emergency Response Center. An Emergency Operator then has a two-way conversation with the user to assess the situation and notify Emergency Response.

Key features and benefits:

- *Samsung S Health features, including step counts, calorie count, heart rate monitoring and personalized fitness and health goals*
- *Local weather at the touch of a button*
- *Integrated with nationwide wireless voice, data and GPS technology to provide 24/7/365 emergency monitoring services and location tracking*
- *Works anywhere in the U.S. where cellular networks are available*
- *Equipped with a 2-way microphone and speaker to communicate with our US-based Emergency Response Center if you need help*
- *MobileHelp is an FDA-registered Company.*

You're Invited to be Part of the First MobileHelp Smart Reveal

You are among the first to see and review this new product solution. In this kit, you will find:

- *One MobileHelp Smart – in test mode for your review*
- *Features and benefits information*
- *Thumb drive with links to press information*

We look forward to working with you. In conjunction, we will be reaching out to you on specific lead generation efforts MobileHelp will fund to drive new business for all involved. After you have completed your review, MobileHelp would like to get the MobileHelp Smart returned to us (please see enclosed return instructions).

If you need any further information, please contact Nick Downarowicz, Director of Digital Marketing, at (561) 347-6255 ext. 553 or nick.downarowicz@mobilehelp.com.

Respectfully Yours,

The MobileHelp Family

Meet the Future

MobileHelp Smart embodies a new frontier of discreet wearable medical alerts. With built-in GPS location tracking, microphone and speaker, activity tracking, vital sign sensors and health-focused applications, MobileHelp Smart marks the future of digital health.

The MobileHelp Smart medical alert system is so discreet that it is virtually invisible to observers. Enjoy 24/7/365 protection without hesitation. Say goodbye to the stigma of traditional medical alerts with a medical alert smart watch, custom designed by two of the world's leading tech giants.

Stylish, subtle & smart enough to save your life.

Meet the Features

MobileHelp Smart features military grade hardware, including a Corning® Gorilla® Glass SR+ Watch Face that helps to resist scratches, water, dust and extreme temperatures. MobileHelp Smart utilizes nationwide cellular networks and GPS location tracking to provide users with award-winning 24/7/365 US-Based MobileHelp Emergency Response.

With a battery that lasts up to 2 days on a single charge, MobileHelp Smart invites you to venture further, wherever you happen to go. Use the S Health app to set target goals for fitness, diet, frequency of heart rate measuring and more. Track your progress with easy to read chart and graph summaries of your activity, diagnostic and diet data.

Share Your Experience

How do you see MobileHelp Smart technology affecting the future of wearable medical alert devices? What is the most appealing aspect of MobileHelp Smart?

Please take the time to experience and enjoy all MobileHelp Smart has to offer. We look forward to working with you and your team and thank you for joining us in this revolutionary advancement of wearable medical alerts.

Your review of the MobileHelp Smart is vital to this new product launch. In conjunction, we would like to partner with you around development of lead generation efforts, and we will reach out to you in the coming weeks to discuss that with you.
